Phonetic Transcriber User Manual

1 Instructions to run locally

To run this web app locally simply install the dependencies of the Node JS modules by type npm install into the CMD. Then type node server.js to host it locally, enter the URL: localhost: 8080 into your browser and the web app will show up to use.

2 Instructions to run in Office

To run this in office, simply sign into your Office 365 account and open up a Word, Excel or PowerPoint document. Go to the insert tab and click Office Add-ins, then click upload my add-in and it will prompt you to upload an XML manifest file. This manifest file will be in the ZIP file we submitted to be used. This manifest file points to our web app which is hosted on the Microsoft Azure server https://phoneticapp.azurewebsites.net . We also have a support page on using the app if you need extra help with using it in Office, the URL for the support page is https://phoneticapp.azurewebsites.net/support.html
